Unexplained triangular UFO sighted in Elizabeth City

On the night of March 4, 2025, an **unusual aerial phenomenon** left a resident of Elizabeth City, North Carolina, baffled. According to a report published on the NUFORC website, a witness observed an unidentified flying object with remarkable characteristics while driving home late at night.

At approximately 10:11 PM local time, the witness noticed seven bright yellow lights hovering over a house. The lights formed a peculiar pattern: four glowing circles were aligned in a straight line, with three more positioned directly beneath them, creating the impression of a structured triangular shape. The observer, viewing the object at an estimated elevation angle of 45 degrees, noted its distinct yellow and gray hues.

The witness reported that the object remained stationary, seemingly defying gravity as it hovered silently over the house. Then, it began moving sideways at an extremely slow pace, reinforcing its enigmatic nature. As the observer reached for their phone to call their husband, they looked up again—only to find that the object had completely vanished in an instant, leaving behind an air of mystery.

Although this sighting was reported by a single individual, it adds to a growing list of similar testimonies fueling ongoing discussions about unidentified aerial phenomena. Enthusiasts and researchers alike are left with pressing questions: Was this a secret military aircraft, or something far beyond our current understanding?
