

Unidentified lights caught over New Taipei

On October 30, 2020, as night had fallen, a ufologist was on his way home when he spotted several **unidentified lights** not far from his home. He was able to record these amazing UFOs.

That evening Scott C. Waring, who is a school teacher in Taiwan, had finished his day's work. It was then that he saw strange moving lights in the sky.

He tells:

“Hey guys, I was closing my window for the night at work when I saw these strange lights in the sky. They are not spot lights. I walked over there after work and saw nothing in that area for three blocks. I have never seen these lights in this location before, so I began to record a short video of them. I was still at work and wanted to say goodbye to some kids in person so I ended the video after a minute and a half. Twenty minutes later after work the lights were gone, but I walked that way to go home and saw nothing in that location. I believe these to be some kind of energy ships with energy beings aboard. They don't have a pattern to their movements and are moving unpredictably. Aliens over my home, I'm not surprised.”
