

# NASA photographed a flying saucer on Mars

By consulting photographs of the planet Mars, a ufologist made a sensational discovery. In this picture, he noticed a **real flying saucer** crashed to the ground ...

Jean Ward is a famous internet ufologist. Recently, in an image taken by NASA, he saw the presence of a huge spherical object that crashed into Mars. The UFO is estimated to be around 15 meters in diameter.

According to the expert, the pilot of this machine was in distress. He therefore had to make an emergency landing.

This photograph (titled PSP\_001984\_1735) was taken by Mars Reconnaissance Orbiter on December 29, 2006.
