

Toronto Resident Spots Large UFOs over the Lake

TORONTO, ON - On the morning of February 12th, 2023, a Toronto resident experienced a mind-boggling event when they witnessed a **large UFO** in the sky. The incident occurred at around 10:40 am and lasted for approximately 5-15 minutes.

According to the witness, the object was all black and the size of two helicopters. It was less than a kilometer above the ground and flew over their head as they stood on their balcony. The witness reported that the object was joined by several other UFOs over the lake.

The witness stated that the UFOs appeared to be dancing in the sky for about 5-15 minutes before disappearing at insane speeds. The witness reported no sound and was amazed by the speeds the UFOs were traveling. Some of the UFOs appeared to be spawning in and out of spacetime, adding to the otherworldly experience.

As we continue to explore the mysteries of the universe, incidents like these remind us that we have much to learn and discover.
