

## Ukraine - A UFO filmed in Kyiv in March 2022

On March 5, 2022, in the middle of the night, an **unidentified flying object** was filmed over the city of kyiv. At that time, the war between Russia and Ukraine had already started...

Ufologist Scott C. Waring explains:

*“Hey check this out. This is some raw footage of an unknown craft over Kiev, Ukraine a few days ago. The object was hovering low, then shot up at an angle and then across the city to shoot up and then down again. Very odd behavior of an aircraft. But then again its war, so it could be anything. However I distinctly remember that during the Fukushima, Japan there was a nuclear reactor leak and a news video taken which accidentally caught a white long tictac UFO flying low and slow over the reactor. I think this may be there for the same reason. A reactor leak not only causes harm to the humans below, but makes it unusable to aliens too...for thousands of years. This object has all the signs of being a UFO.”*
