

UFO Spotted Hovering over Bus Depot in Edinburgh

A strange sighting occurred in the early hours of May 2, 2023, around 3:30 AM. A couple of witnesses claim to have seen an **unidentified flying object** hovering above a bus depot, leaving them perplexed and astonished.

The couple was driving down from the Calder Road roundabout when their attention was drawn to a disk-shaped object hovering over the bus depot. They describe the object as being the size of at least two football pitches and with lights on it.

What is particularly surprising is that despite this unusual sighting, the witnesses continued with their activities as if the object wasn't there. However, their surprise was evident as they looked at each other and exclaimed in astonishment. It is important to note that the witnesses claim they were not under the influence of alcohol that evening, ruling out any explanation based on distorted perception due to intoxication.

Once they arrived home, which was directly opposite the bus depot, one of the witnesses looked out the window and noticed that the object flew away at an incredible speed, without making any noise.
