

## UFO in Diamond Shape Observed in Mississauga, Canada

Mississauga, Ontario - On July 1, 2021, at 2:03 AM, a mysterious event unfolded in the sky above Mississauga, Canada. A witness reported observing an **unidentified flying object** in the shape of a diamond, moving at high speed and emitting a bright white glow. This unusual sighting has sparked numerous questions regarding the origin and nature of this unidentified flying object.

On July 1, 2021, at 2:03 AM, a resident of Mississauga witnessed a strange event in the night sky. The observed object had a diamond shape and emitted a bright white glow that did not dim or flicker. It moved at an extremely high speed, following a straight path below the clouds. The witness described an aura or haze surrounding the object. There were

no flashing lights, exhaust trails, or sound accompanying its passage. The object appeared from the east and traveled westbound. Unfortunately, the witness's security camera did not capture the object; it only recorded the witness looking at the object for eight seconds until it disappeared over the western horizon. This observation defies conventional explanations and raises questions about the nature of the object.

According to the witness, the unidentified flying object had a distinct diamond shape. Its intense white glow remained constant without any variation or flickering. The object moved at an extremely high speed, following a straight path below the clouds. It appeared from the east and maintained a westward direction. The witness noted that there were no flashing lights, exhaust trails, or audible noise associated with the object. Additionally, an aura or haze seemed to surround the object, adding to its mysterious character. Unfortunately, the witness's security camera was unable to capture the object, limiting the visual evidence of this unusual sighting.
