

## Two UFOs spotted over McMurray, Pennsylvania

On the night of September 24, 2022, a mysterious and captivating event shook the tranquility of McMurray, Pennsylvania. A resident, who wished to remain anonymous, shared a captivating testimony after witnessing **two unidentified flying objects** (UFOs) hovering near the ground behind their house.

According to the testimony published on the National UFO Reporting Center (NUFORC) website, it was around 2:21 AM when the objects were spotted. The resident received a video from their mother, showing the UFOs appearing to float side by side behind the fence in their backyard. These uncanny objects, described as disk-shaped, featured white or yellow lights emitting beams of light. Although the witness wasn't on-site, they described the UFOs as curious or observant rather than menacing.

*"We've all been trying to communicate with the aliens lately by going outside at night and pointing like ET, waving our phones to catch their attention,"* the witness stated in their account. However, this attempt at contact doesn't come without some trepidation, as the nature of the visitors remains unknown. *"I just hope that if they attempt to make contact with us, they do it in a peaceful and civilized way,"* they added.

This wasn't the first time UFOs had been spotted in the area. The night before the testimony, a UFO had already been observed above the witness's backyard, this time by the witness themselves. They admit to having brushed off these observations initially, attributing them to neighborhood drones. However, faced with the increasing frequency of these phenomena, they now wonder if these events are connected.
