

# A cubic object observed in the mountains of Port Angeles

On August 30th, a resident of Port Angeles, in the state of Washington, made an unusual report on the National UFO Reporting Center (NUFORC) website. According to his testimony, on the evening of August 29th around 10:45 pm, while looking at the mountains from Canyon Edge Drive in Port Angeles, the witness spotted a **cubic shaped object** for about 15 seconds.

According to his description, the object appeared to be on fire and was moving diagonally at an angle of about 45 degrees to the ground. Immediately after it disappeared into the heights of the mountain, above IBC Church, intense searchlights began scanning the mountainsides. The witness also claims to have smelled smoke for 2 to 3 minutes after the observation.

The witness reports significant activity where the cubic object seemed to have landed, with many lights, despite an abnormal silence according to him. Although he generally does not believe in UFO sightings, this man states that he saw something unusual and unidentifiable. He hopes not to be the only witness to this strange event.
