

Flying saucer observed in Powell Butte, OR

An **enigmatic observation** has captured the attention of six witnesses at Brasada Ranch on October 8, 2023, at 7:37 PM local time. Details of this extraordinary event were reported on October 12, 2023, at 5:37 PM Pacific time, sparking speculation and curiosity.

According to the witnesses, whose credibility is yet to be confirmed, a disk-shaped luminous object was observed for six seconds. The reported primary colors were white, blue, and green. This disk appeared to hover in the sky before swiftly approaching a house, changing size throughout the observation.

Witness Accounts

The six individuals present during the sighting describe a luminous disk that, initially distant, approached in an unusual manner. Testifying to an aura or haze surrounding the object, they unanimously characterized the phenomenon as fascinating and mysterious. The sequence of events unfolded rapidly, allowing only three seconds of observation before the object took off and vanished without a trace.

The main witness stated, "*We live in the middle of nowhere, where the night sky is devoid of city lights. When we all saw it, we couldn't believe what we were seeing. It looked like a luminous disk changing size very rapidly, then it disappeared as it took off.*"
