

Unidentified Flying Object Sighting in Charlotte, NC

On January 13, 2024, at 7:21 PM local time, a witness reported observing an **unidentified flying object** (UFO) to the National UFO Reporting Center (NUFORC). The report was submitted approximately two hours earlier, at 5:31 PM Pacific Time.

According to the witness, the observation lasted about 30 seconds and occurred in Charlotte, North Carolina, specifically on I-485 Outer, between the Harrisburg Road exit and the Rocky River Road exit.

The object was described as triangular in shape, smaller than a Boeing 747 but larger than a light aircraft. The witness was traveling north/northwest when the object was spotted at an elevation angle of about 35 degrees and an estimated distance of a quarter mile. The object's speed was estimated to be between 45 and 75 miles per hour.

The report further details that the object had green lights arranged in a V-shape. The witness was driving westbound on I-485 Outer when they noticed several green lights in a row. They initially thought it was a stationary object, but then observed movement and a V formation. The object was traveling eastbound and crossed I-485 at a slow speed. Its size was estimated to be 300 or 400 feet high. All the lights were green and not excessively bright.
