

UFO Sighting Report in Davenport, WA, USA

On **March 3, 2024**, at **8:55 PM local time**, in the town of **Davenport**, located in the state of Washington, USA, an enigmatic event was reported by two witnesses. This testimony was recorded and broadcasted on the website of the **NUFORC** (National UFO Reporting Center), a center for reporting sightings of unidentified flying objects.

The witnesses describe observing a triangular-shaped craft moving in an unusual and fast manner. As they walked out their back door to take the dog out, they noticed a craft with three white lights arranged in a triangle shape and a large orange/red light in the center, moving over the hills in every direction tightly and incredibly fast. The object then dove out of sight behind the hill. The witnesses specify that they are located on a hillside opposite to where the object was seen. They also note that their area is usually frequented by both commercial and military planes due to the proximity of the airport and Air Force base, but this event was unlike anything they had seen before. Although this is their first official report, they mention that it is not the first time they have observed a similar phenomenon in the area.

Conclusion

This event, though brief, presents intriguing and mysterious characteristics that raise questions about the nature of the observed object. Although the witnesses could not provide a precise estimation of the size and speed of the object, their detailed description of its unusual movements and distinctive lights suggests a phenomenon difficult to explain by conventional means. This incident remains open to interpretation and investigation, leaving room for curiosity and speculation about the possibility of encounters with unidentified aerial phenomena.
