

Flying Saucer Sighted in Waterford, Connecticut

On September 28, 2024, at 9:36 PM local time, an **unidentified flying object** (UFO) was spotted in Waterford, Connecticut, USA. The sighting was reported a few hours later, on September 29, at 5:54 AM Pacific time. Though the event lasted only 15 seconds, it left a strong impression on the sole witness.

Details of the Sighting

The UFO was observed above a pond and nearby shops in Waterford. It had a disk-like shape, metallic and silver in color, with an estimated size comparable to that of a car. The object appeared to be moving at an estimated speed of 75 miles per hour. A striking feature was the colorful lights rotating rapidly around the base of the craft, which immediately caught the witness's attention.

Behavior of the Object

According to the report, the UFO descended rapidly from the clouds, becoming low enough to be clearly visible. Interestingly, despite its proximity and speed, the object made no sound. After 5 to 10 seconds of observation, the UFO abruptly changed direction, ascending vertically at an incredible speed before vanishing into the clouds.

Analysis of the Event

The sighting occurred at an angle of 70 degrees from the observer, with an estimated closest distance of 300 feet (approximately 90 meters). The UFO's behavior, particularly its fast, silent ascent and disappearance, is both puzzling and remarkable.

The lack of sound, the disk shape, the speed, and the precise movement of the object are characteristics frequently associated with UFO sightings. The witness also described colorful lights on the bottom of the craft, a feature commonly reported in similar encounters.
