

# A Triangular UFO Spotted in DeBary, Florida

On January 5, 2025, a lone military witness reported an **unusual UFO sighting** in the small town of DeBary, Florida. The incident, documented by the National UFO Reporting Center (NUFORC), lasted approximately five minutes and left the observer perplexed.

## A Tranquil Afternoon Disrupted

The witness stated they were enjoying their afternoon watching airplanes from a hammock in their backyard. DeBary, located in the flight path of several airports, often provides skywatchers with fascinating aerial views. However, on this particular day, an unusual object caught their attention.

## A Metallic Object in Motion

Initially perceived as a possible rocket launch due to its ascending trajectory, the object revealed itself to be something entirely different when observed through binoculars. It was a large, metallic triangle with a golden or metallic hue. The object, approaching from the southeast, remained stationary for a brief moment before moving south at a variable speed. According to the witness, its speed was slower than that of a typical airplane, adding to its unusual nature.

## Strange Lights Beneath the Object

The triangle was accompanied by three glowing dots beneath it. The witness noted these lights could have been sunlight reflections on the object's metallic surface, but their unusual brightness contributed to the mystery surrounding the sighting.

## "The Strangest Thing I've Ever Seen"

"I watch planes from my hammock all the time, but I've never seen an object move like this. It was, without a doubt,

the strangest thing I've ever seen in the sky," the witness reported.
