

Anna Paulina Luna Discusses Her Investigations Into Unidentified Aerial Phenomena

On a recent podcast, Florida Representative [Anna Paulina Luna](#), who chairs the *House Task Force on the Declassification of Federal Secrets*, shared a series of experiences and inquiries related to unidentified aerial phenomena (UAP).

Among the incidents she described was one at Eglin Air Force Base, where numerous pilots reportedly witnessed UAPs. Another case allegedly took place at Vandenberg Space Force Base, where several individuals, including a pilot, claimed to have seen a red cube-shaped object larger than a football field.

Luna also recounted her own experience while serving at the Portland Air National Guard Base. According to her, there was an “airspace incursion” which she attempted to investigate, only to be told by pilots: “we can’t really talk about it,” as they feared being “taken off flight status.”

The congresswoman further asserted that she has seen evidence of technology purportedly created by “interdimensional beings” capable of moving “outside of time and space.” She added that some biblical texts may have been removed because they touched on similar subjects.

Regardless of political opinion about her, Luna’s statements draw attention to the ongoing debate on disclosure, as

unidentified aerial phenomena continue to intrigue the public and raise questions within both military and civilian circles.
