ago after a dress rehearsal for an upcoming dance performance. Exhausted, Hawn said she had fallen asleep inside a friend's car when she was suddenly awakened by what she described as a "high-pitched sound."

Startled, she looked out of the window — and what she claims to have seen has stayed with her ever since.

"I saw these two or three triangular-shaped heads," Goldie Hawn recalled. "They were silver in color, slash for a mouth, tiny little nose, no ears."

According to the actress, the mysterious figures appeared to be observing her closely.

"They were pointing at me in the car as if they were discussing me like I was a subject," she said, adding that the beings emitted a droning sound throughout the encounter.

Hawn admitted she could not tell whether the experience was real or imagined. However, she vividly remembers the overwhelming sensation that followed.

"It was like bursting out of a forcefield," she explained. "And of course, I went back to all the kids and said, 'Oh my God. I think I made contact with outer space.'"

In the years that followed, Goldie Hawn said she began investigating the incident further. She eventually spoke with an astrophysicist who interviewed her about the event, helping her recall additional details from that unusual day.

Despite the bizarre nature of the story, Hawn insists the experience left her with an unexpectedly positive feeling. She described it as "the most benevolent, loving feeling" she had ever experienced, saying she felt "filled with light" afterward.

Today, the actress acknowledges that she may never know exactly what happened. Yet she appears comfortable with the mystery remaining unsolved.

"I'll probably never know," she admitted during the podcast. "But I kind of like it that way."
