

Rods photographed at Harewood House in 2005

Rods were photographed in the grounds of Harewood House, England, May 29, 2005 after a particularly hot afternoon. "Rods" (or "skyfish") are elongated objects or shapes that occasionally appear in videos and photographs, typically during landscape or sky shots. Some paranormal and conspiracy enthusiasts believe that these rods could be extraterrestrial creatures or unknown entities moving at incredible speeds, eluding the human eye.
