France - A UFO and a crop circle in Saint-Saëns in 1979

During the fall of 1979, several residents of the town of Saint-Saëns in northwestern France witnessed an **UFO** with exceptional characteristics...

On the day in question, a woman, whose identity has not been revealed, was at home. Through the window, she saw a huge red ball hovering above a field not far away. The unidentified object was flattened on top. The witness specified that it was completely silent. The light it emitted was very powerful without being dazzling.

A neighbor would testify to having witnessed this phenomenon, thus corroborating the statements of the main witness. But that's not all. The owner of the field would claim that what he had sown was flattened. This circular crop circle thus constitutes the only physical evidence of the passage of this UFO.

UFOs, like this one, remain impossible to explain. It is known that governments worldwide are more or less secretly interested in these phenomena. Unfortunately, the results of these investigations are often opaque...
