Flying saucer discovered over Bermuda Triangle

On February 13, 2022, a **black flying saucer** was discovered on Google Earth over the Bermuda Triangle. What is it about?

Scott C. Waring, ufologist, explains:

"*Guys, I just found a flying disk on Google Earth and believe it or not, its in the center of the Bermuda Triangle. The legendary location where boats, ships, planes have all mysteriously disappeared! This is literally the most mysterious place on earth! However I happen to know that an alien base does exist below the Bermuda Triangle and that its not so deep below the floor of the ocean. I mean instead of being 4-6km deep, its actually only 20-50 meters below the floor. That is the reason for all the magnetic interference causing computers and compasses to go haywire. This discovery is 100% proof that the disappearances in Bermuda Triangle were all caused by aliens!*"
