

Apollo 11's 'third astronaut' reveals secrets from dark side of the moon

The documentary "**Apollo 11's 'third astronaut' reveals secrets from the dark side of the moon**" highlights the crucial yet often overlooked role of **Michael Collins**, the pilot of the Apollo 11 command module. While **Neil Armstrong** and **Buzz Aldrin** made history by walking on the moon, Collins remained in lunar orbit, ensuring their safe return. In this rare interview, he shares insights about his unique experience, the challenges of the mission, and the vital role he played in its success. Without him, one of humanity's greatest achievements could have ended in failure.
